VIROXX

Optimal room air hygiene through permanent reduction of odors, germs and viruses

■ A proven technology in optimized form

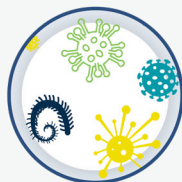

bioclimatic presents the successful VIROXX series now streamlined as a compact, efficient and user-friendly version.

Our worldwide unique combination of pre-filtration, photochemical disinfection and bipolar ionisation with patented technology is crucial with its efficacy - and more important than ever: Dangerous viruses (Ebola, SARS, avian influenza etc.), germs (MRSA,

3MRGN, 4MRGN) and pathogens are being permanently inactivated. Healthy and clean indoor air is created by a noticeable reduction of pollutants and odors. To complement this superior technology, the look had to please the eye as well: the housing of

OUR DAILY COMPANIONS

■ Germs

Multiresistant germs and specific viruses are becoming more dangerous.

■ Odors

The presence of putrid smells and odors can be quite disgusting.

■ Allergens

Approximately 20% of all people are battling with allergies every day.

■ Other irritants

Volatile Compounds (VOCs) are harmful chemicals emitted from every day products.

the new VIROXX generation has been redesigned, is now easy to move and universally applicable. The supplied remote control allows a comfortable and individual adjustment or adaptation to the respective air contamination. For requirements in which

virus control is of secondary importance, we offer a product variant, namely aeromat, that provides fresh and odorless indoor air conditions.
